

CITY OF JANESVILLE
Wisconsin's Park Place

August 2, 2012

To Whom It May Concern:

RE: Soil borings on certified site.

For a previous prospect in 2004, a total of 32 soil borings were taken. (Please refer to "Site Physical Characteristics" section Appendix #5.) Of those approximately 18 were taken within the 224 acres of this site. Borings were not taken in the northern or western sections. Since those areas do not have specific test results the City of Janesville will offer to a qualified prospect 6-8 soil tests per 20 to 25 acre site at no cost. Note: Funding is available through TIF #35 where this site is located. Please recognize that based on our knowledge, this site has been solely used for agricultural purposes for the past 100 years with documentation since 1956.

Sincerely;

A handwritten signature in black ink, appearing to read "Vic Grassman".
