I. EXECUTIVE SUMMARY

Cedar Corporation has performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-05 of the Eagle Ridge Business Park property located in Prescott, WI, the property. Any exceptions to, or deletions from this practice are described in Sections II.C. of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

The results of this study are based upon the professional interpretation of information available to Cedar Corporation during the time and budget constraints of this assessment. Cedar Corporation has considered that the information provided by the cited references is complete and correct. Cedar Corporation does not warrant that this report represents an exhaustive study of all possible environmental concerns at the Property. The items investigated as part of this study represent the most likely sources of environmental concern, and are consequently believed to address your needs at this time.

Title: Hydrogeologist

A. Purpose and Scope

This assessment was designed to provide information concerning potential environmental liability associated with past or present land use practices at the Property and surrounding properties and is meant to constitute all appropriate inquiry into the previous ownership and use of the Property, consistent with good commercial and customary practices to identify recognized environmental conditions. The scope of work for this assessment includes a review of those maps, photographs, and other records pertinent to this and surrounding properties. In addition, a review of those federal, state, tribal and local government records

for a documented release of hazardous substances or petroleum products and those activities which may contribute a release of hazardous substances or petroleum products is included. These records include, but are not limited to: landfill reports, underground storage tank reports, hazardous waste handler and generator records, spills report, as well as the federal registries for hazardous spills and usage of hazardous materials.

B. Special Terms and Conditions

This Phase I Environmental Assessment conforms to standards described by the American Society for Testing and Materials (ASTM), specifically to the ASTM *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-05*.

Cedar Corporation has completed, or observed the completion of, the services provided during this Phase I Environmental Property Assessment. This work has been completed using that information which is both reasonably ascertainable and practically reviewable. In this sense, it is not exhaustive. As site conditions may change with time due to development and operational practices on this and adjoining properties, this report has a limited life. Cedar Corporation reserves the right to alter the opinions expressed herein should additional information pertaining to the environmental quality of this site become available. No warranty, expressed or implied, is made.

C. Limitations and Exceptions of Assessment

This report does not contain any considerations beyond the scope of the ASTM E1527-05 standard unless discussed in Section VI. Any data gaps and their significance are documented and discussed in Section V.F.

D. Methodology

The environmental assessment conducted at the Property included the following:

1. Records Review
2. Interviews
3. Site Reconnaissance
4. Data Evaluation and Report Preparation

Methods utilized to perform each of these tasks are described below.

1. Records Review

The Property was reviewed to familiarize and orient important site and local features to available maps, photos, and other information. Local physiography, geology, and hydrology were evaluated by reviewing publications and topographic maps available from the United States Department of Agriculture (USDA), the United States Geological Survey (USGS), and the Wisconsin Geological Survey. Practically reviewable aerial photographs were analyzed to help determine historical land use.

Standard environmental records as described below, were reviewed by a contract environmental records data base company. For this report, EDR (Environmental Data Resources, Inc.) provided this information, EDR provides a database search of Federal and State records which are not practically reviewable unless they can be obtained from a source agency such as EDR. Appendix A contains the complete EDR report.

The following reasonably ascertainable and practically reviewable records were reviewed for the listed approximate minimum search distances:

<u>Standard Environmental Record Sources</u>	<u>Approximate Minimum Search Distance</u>
Federal NPL site list	1.0 mile
Federal Delisted NPL site list	0.5 mile
Federal CERCLIS sites	0.5 mile
Federal CERCLIS NFRAP site list	0.5 mile
Federal RCRA CORRACTS facilities list	1.0 mile
Federal RCRA non-CORRACTS TSD facilities list	0.5 mile
Federal RCRA generators list	Property and adjoining properties
Federal ERNS list	Property only
State and tribal lists of hazardous waste sites identified for investigation or remediation:	
State and tribal-equivalent NPL	1.0 mile
State and tribal-equivalent CERCLIS	0.5 mile

State and tribal landfill and/or solid waste disposal site lists	0.5 mile
State and tribal leaking UST lists	0.5 mile
State and tribal registered UST lists	Property and adjoining properties
State and tribal institutional control/engineering control registries	Property only
State and tribal voluntary clean-up sites	0.5 mile
State and tribal Brownfield sites	0.5 mile

Sanborn Fire Insurance Map files were also reviewed and evaluated for the location of environmental concerns near the Property (if available).

Building inspection and zoning records were reviewed to identify current and past land use of the Property and adjacent properties. Tax Department and Public Records were consulted to help evaluate and determine past land use and property ownership.

2. Interviews

Personal interviews were conducted with owners, occupants, people familiar with the Property, and with local government officials to collect historical land use, hazardous substance or petroleum product use, and property characteristics relevant to the Property and surrounding area. Significant documents were requested from the key site manager. These documents included: prior environmental assessment reports, audit reports, environmental permits, UST or AST registrations, material safety data sheets, community right-to-know plans, safety plans, spill prevention control or countermeasure plans, hydrogeological reports, notices of past or current environmental law violations, hazardous waste generator reports, and geotechnical studies. The Property owner was also interviewed regarding any proceedings involving the Property including: pending, threatened, or past litigation; administrative proceedings; or any known notices from governmental entities regarding possible violations of environmental laws; or potential liability relevant to hazardous substances, or petroleum products in, on, or from the Property.

3. Site Reconnaissance

The Property was inspected by Cedar Corporation personnel. Geologic, hydrologic and topographic conditions were observed and recorded. Inspection of the Property included interior and exterior of any accessible buildings. From these observations, a general description of the Property and adjacent properties was compiled. Public or private thoroughfares,

potable water supply, sewage disposal system, heating/cooling systems, drains or sumps, storage tanks, odors, pools of liquid, drums, unidentified substance containers, unusual electrical and hydraulic equipment, hazardous substances and petroleum products, pits, ponds, lagoons, and solid waste disposal areas observed, were noted and recorded. Areas which exhibited characteristics such as surface staining, stressed vegetation, or which were found to be littered with debris were evaluated and recorded. Obvious nearby off-site potential sources of hazardous substances or petroleum products were also noted.

4. Data Evaluation and Report Preparation

Data collected during all portions of the assessment were evaluated, collated and assembled into this report. This report was completed by or under the supervision of an environmental professional meeting/exceeding the definition of an environmental professional as defined in 40 CFR.10 § 312.10 (Standards and Practices for All Appropriate Inquiries; Final Rule).

IV. RECORDS REVIEW

A. Environmental Records Review

A search of available Federal and State environmental records was conducted by Environmental Data Resources, Inc. (EDR). The search met the specific requirements of ASTM Standard Practice for Environmental Site Assessments E1527-05. The following discussion of the results of the database search is limited to sites with locations that were positively identified by EDR. A list of orphan sites that have insufficient address information such that they can only be identified as within zip code, city or county of a target property was also provided by EDR. Where possible, orphan sites were identified and pertinent information included in this report. The EDR report is included as Attachment A.

Due to poor address or mapping information, several sites included in the EDR Report were mapped incorrectly or were unable to be mapped (“orphan site”). Where possible, these sites were verified and the corrected information is reflected in this report.

Of the listed sites, those with known releases to the environment (former Tom Thumb Store, Prescott School Dist. Bus Garage), both have received case closure from the State with no known or suspected impact to the property.

None of the listed sites have known impacts to the Property.

B. Overview of Local Geology and Hydrogeology

Data Source

Surface Soil: Dakota loam, Kasson silt loam, Lamont fine sandy loam, Lilah-Wykoff complex, Rockton silt Loam, Vlasaty silt loam, Wykoff loam

E. Recognized Environmental Conditions

No recognized environmental conditions were observed, found to be associated with, or found to be affecting the property during the course of this assessment.

F. Data Gaps

The use of the property prior to 1939 could not be determined through the reasonably ascertainable and practically reviewable resources reviewed as part of this assessment. Based on the information available it is the Environmental Professional's opinion the data gap has no perceived potential to affect the environmental quality of the property.

VI. NON-SCOPE CONSIDERATIONS

No considerations beyond the scope of ASTM E1527-05 were addressed during completion of this assessment.

VII. CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-05 of the Eagle Ridge Business Park property in Prescott, WI, the Property. Any exceptions to, or deletions from, this practice are described in Section IIC of this report. **This assessment has revealed no evidence of recognized environmental conditions in connection with the property.**

I declare that, to the best of my professional knowledge and belief I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The results of this study are based upon the professional interpretation of information available to Cedar Corporation during the time and budget constraints of this assessment. Cedar Corporation has considered that the information provided by the cited references is complete and correct. Cedar Corporation does not warrant that this report represents an exhaustive study of all possible environmental concerns at the Property. The items investigated as part of this study represent the most likely sources of environmental concern, and are consequently believed to address your needs at this time.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. MN CDL: Clandestine Drug Labs

This data was passively gathered. That is, the DOH asks law enforcement and other agencies to notify them of Clandestine Drug Labs (CDLs). They do not require reporting of events. Therefore the data represents only a subset of all CDLs. This data has not been verified. The DOH has made no attempt to verify that reported CDLs actually occurred. They have no knowledge if the CDL was involved in cooking or just consisted of chemicals associated with Meth production. The reports they receive are that a suspected CDL was seized.

WI AG SPILLS: Agricultural Spill Cases

Spills reported to the Department of Agriculture, Trade & Consumer Protection. There are two types of spills. Long-term: These are mainly pesticide and fertilizer cases. Some might include other contaminants at the same site. Some might involve wood-treaters - which use pesticides. All of them involve spills of products, but these spills generally result from day to day use (chronic spills) rather than accidental spills (acute). Accidental: These are the acute spills of pesticides and fertilizers and only involve pesticides and fertilizers. Most of these are cleaned up and closed within 3 to 6 months.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

BRRTS is a tracking system of contaminated sites. It holds key information for finding out more about a site or an activity. Activity types included are: Abandoned Container - An abandoned container with potentially hazardous contents recovered from a site. No discharge to the environment occurs. If the container did release a hazardous substance, a spill would be associated with the site. Superfund - is a federal program created by Congress in 1980 to finance cleanup of the nation's worst hazardous waste sites. VPLE - Voluntary Property Liability Exemptions apply to sites in which a property owner conducts an environmental investigation and cleanup of an entire property and then receives limits on their future liability. General Property - Environmental actions which apply to the property as a whole, rather than a specific source of contamination, such as the LUST or environmental repair site. Examples would be off-site letters, municipal liability clarification letters, lease letters, voluntary party liability exemption actions, and general liability clarification letters.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.
